

ROSETTA RADIOLOGY
1421 THIRD AVENUE, (BET 80TH & 81ST Street)
NEW YORK, NY 10028
(212)744-5538 - FAX (212)744-4767 OR (212)570-1580

PREPARATION FOR CORE BIOPSY: Three days prior to the core biopsy, do not take any medications that increases bleeding (**see attached list**) such as aspirin or products that contains aspirin, non steroidal anti-inflammatory medication such as Motrin, Advil or Aleve.

If you are taking Coumadin, you will need to speak to your physician who monitors your Coumadin regarding whether you can discontinue the medication for a short interval.

Please wear a tight fitting bra on the day of your procedure, such as a sports bra. After the biopsy, you will be given an ice pack and instructions not to exercise or do any heavy lifting for twenty four hours (**24**). We also asked that you **refrain** from swimming and taking tub baths until the biopsy site is healed. You will be able to shower the day after the biopsy.

In you have any questions, please call us at (212)744-5538
